

**Meeting:** Second Supervisor Meeting  
**Date:** 23<sup>rd</sup> August 2016, 1415  
**Location:** SIS 4021  
**Attendees:** Gao Min, Weilun, ZongWei, Wendy, Chingyi  
Prakash  
**Absentees:** -  
**Minutes Prepared by:** Gao Min  
**Vetted by:** Wendy

---

### **Points to Note**

- (1) Sometimes the clients don't know what they want
- (2) How do we handle duplication of records? – possibility of wrong tax calculation  
How do we validate our tax calculation is valid & correct (gather huge set of data for validation?)
- (3) Analyst - based on past data to show what is likely to happen and what to expect.
- (4) For parse phasing out problem - consider using SQLite for DB. But if android version is still running, migration after fyp finish is not a big issue.
- (5) Photo-capturing – for validating & auditing purpose.

Meeting is adjourned at **1450**
