

NEW USER ACCOUNT

- 1) **Had to create new user account** – was still unable to access profile section using original user account.
 - a. Followed instruction to delete previous version before installing current version.
 - b. Logged in using original account but encountered same (earlier) problem when accessing profile section i.e. app closes upon clicking on 'Profile' button.
 - c. Created a new user account and successfully managed to access profile section.
- 2) **Will this be a problem for test users if they need to download updates?**

REGISTRATION

- 3) **Registration cuts off at email entry** – have to click 'Done' before phone & admin pin info can be keyed in.
 - a. Business name was not captured in profile section.
 - b. **Check again that registration info fields are consistent with profile info fields.**

HOME/MAIN PAGE

- 4) **Visual appearance** – Break up the all-white background.
 - a. Use a light green background (similar to that of the SH logo's) for the 'Set Monthly Target' and 'Add New Record' sections. This will help better demarcate the various sections of the home page.
- 5) **'Sync'** – working, managed to sync successfully.
- 6) **'Set Monthly Target'** – working, managed to set target successfully.
- 7) **'Add New Record'** – working.
 - a. Amend message notice when info is saved to a 2-line notice:
 - i. <Line 1> Successfully Saved! <Line 2> Please continue.

8) Figures shown – try to increase font size of text and numbers

- a. Adjust the 3 lines of info to this format
 - i. 'Today's Figures'
 - Typically hawkers will key the figures at the end of the day i.e. Sales, COGS, Expenses will be at '0' until the evening or night, but there may also be some who may make multiple entries over the day.
 - ii. 'This Week's Figures'
 - iii. 'This Month's Figures'
 - b. **Remove 'Sales – This Month' and shift this line & its info to the analytics section.**
 - c. **By displaying the figures in this day, week & month manner, it makes it more consistent and easy to read i.e. it's a quick and simple snapshot of the hawker's key figures.**
- 9) **'Report'**
 - a. Bold the 'Net Profit' line of text/info.
 - b. Amend legend under chart to this sequence – Total Sales, Total COGS, Total Expenses.

c. **Include Net Profit in the charts to be consistent with data/info being reported.**

d. 'Income Tax'

i. Revenue – Insert 'Total Sales' in brackets underneath.

ii. Gross Profit – Amend bracketed info underneath to 'Total Sales – Total COGS'.

iii. Allowable Business Expenses – Remove '(Optional)'; Amend bracketed info to 'Please assess your Total Expenses and enter allowable amount. Check IRAS website if unsure.'

iv. Adjusted Profit/**Loss** (Gross Profit – **Allowable Business Expenses**) – No need bracketed info underneath for this item/line. But please amend phrasing as indicated.

v. Reason for these changes is to that there is visual/text/phrasing consistency for users when they toggle between the report info, charts and income tax computations.

10) 'Analytics' – **Data not very comprehensible at this point. Is this section ready for UAT testing?**

11) 'Home' – working.

12) 'Calendar' –

a. Each daily record should be displayed in this sequence - Sales, COGS, Expenses, Profit. **Profit info missing, please insert.**

b. **Lock the days of the week at the top of the screen. It appears & disappears during page scrolling.**

c. Records tab is a good feature. Good for overview and quick recall. Nice!

13) 'Profile' – working, able to use all features.

a. Business name was not captured from registration phase.

b. **Check again that profile info fields are consistent with registration info fields.**
