Meeting: Team Strike's Final Presentation
Date: 15th April 2016
Location: SIS SR 2.1
Attendees: Gao Min, Weilun, ZongWei, Wendy

Absentees: Chingyi (DA's Final)
Minutes Prepared by: Wendy
Vetted by: Gao Min

Points to Note

(1)   Report/ (Analytical to-be?) Function: Graph display chart can be improved on e.g. showing significant difference based on selected period (week/month/year) (UI, UX) Chart to display trend as an overview.

(2)   Changing Language Function: Icon should perform dynamic change based on selected language - not all icon is universal

(3)   Syncing function: Improve UI/UX by
        a. prompting/reminding users to sync
        b. performing auto sync once network has been detected

Key Takeaways

(1)   Demonstration is key!!! Rehearsal is important!!! Final Presentation 99.9% flawless

(2)   Take initiatives (resolve existing problem with best solution/findings)

(3)   Survey to determine feasibility of the project
        - Would people use this? Any market?
        - How was survey conducted, setting of survey criteria (starting from what to find out)

(4)   Start & finish UAT early
        (Understand what people need most/like/dislike/usability/functionality/reactions)

Additional Information

<div align="center">Final Year Project – HungryMen

IS480</div>

(1)   Android: HTTPS → Parse (lets you store objects in a local datastore on the Android device itself)

(2)   LinearGraphSeries (open source graphing library for Android)

(3)   Glide (Image Loader Library for Android)

(4)   MaterialDateTimePicker (Pick a date or time on Android)

(5)   ButterKnife (Bind Android views and callbacks to fields and methods.)

Presentation is adjourned at **1200**.
